

Mentoring future URM scientists

in cardiovascular, lung and sleep disorders

All-Expenses-Paid Program to Increase Diversity Among Individuals Engaged in Health-Related Research (PRIDE)

Washington University School of Medicine offers an all-expense paid summer institute program to increase diversity in the field of **Cardiovascular Disease Comorbidities, Genetics and Epidemiology (CVD-CGE)**. The program is open to junior faculty and researchers (mentees) in the biomedical and behavioral sciences from underrepresented backgrounds and/or with disabilities.

Apply for the Summer 2022 Cohort

- Establish partnerships between mentors and mentees based on mutual research interests
- Participate in training and workshops on various topics related to cardiovascular disease comorbidities, genetics and epidemiology
- Attend grant-writing sessions conducted by NHLBI staff and PRIDE faculty
- Compete for Small Research Project (SRP) funding to generate preliminary data for subsequent NHLBI grant applications
- Develop skills needed to apply for research grants and promote a sustainable independent research program
