GOAL
To enhance the diversity of the biomedical research workforce through summer institute programs offering Research Experiences, Skills Development Courses, and Mentoring Experiences for junior faculty and transitioning post-doctorates from diverse backgrounds to enable them to become competitive independent scientists.

EXPERIENCE
- Two consecutive summers
- Small Research Project awards to fund pilot projects
- Didactic courses
- Grant writing skills and training
- Hands-on and lab training

SUMMER INSTITUTE PROGRAMS
Research topics vary by program but are centered on heart, lung, blood, and sleep disorders research; health disparities research relevant to heart, lung, blood, and sleep disorders; and relevant research methodologies and approaches specific to these areas. Nine NHLBI-funded sites offering summer institute programs include:

- Impact of Ancestry and Gender on Omics of Lung Diseases (AGOLD)
- Advanced Respiratory Research for Equity (AIRE)
- Behavioral and Sleep Medicine (BSM)
- Cardiovascular Disease Comorbidities, Genetics and Epidemiology (CVD-CGE)
- Cardiovascular Health-Related Research (CVD)
- Future Faculty of Cardiovascular Sciences (FOCUS)
- Functional and Translational Genomics of Blood Disorders (FTG)
- Obesity Health Disparities (OHD)
- Research in Implementation Science for Equity (RISE)

GAINS
- Establish long-term mentoring relationships
- Establish long-term collaborations
- Prioritize research perspectives
- Improve capacity to address health disparities
- Achieve research independence
