Individuals Engaged in Health-Related Research

CARDIOVASCULAR GENETICS AND EPIDEMIOLOGY
Junior Faculty Apply Now for Summer 2017 (July 5 - July 26, 2017)
at http://www.biostat.wustl.edu/pridecge

Washington University in St. Louis School of Medicine offers an all-expense paid summer institute program, initiated and funded by the NHLBI, to increase diversity in the field of Cardiovascular Genetics and Epidemiology with a focus on Cardiovascular Genetic Epidemiology and other Heart, Lung, Blood, and Sleep Disorders. Junior faculty and researchers (mentees) from under-represented backgrounds in the biomedical and behavioral sciences and/or with disabilities qualify. The program involves:

A 3-week all-expense paid summer institute program to:

- Establish partnerships between Mentors and Mentees based on mutual research interests
- Participate in didactic courses, workshops and lectures in genetic epidemiology, bioinformatics, current trends in cardiovascular research, and other topics relating to heart, lung, blood, and sleep disorders
- Participate in special grant-writing sessions conducted by NHLBI scientific program staff and PRIDE faculty
- Develop the skills needed to apply for research grants and promoting a sustainable independent research program for career development
