Title: Post Doctoral Research Associate-College of Nursing/BNS, Izci-Balserak R01 (Job ID #157111)
 Department: Nursing/BNS
 Category: Postdoc Res Assoc
 Location: Chicago
 Close Date: 12/10/2021

Description: The College of Nursing at the University of Illinois Chicago is one of the premier nursing schools in the nation, with undergraduate and graduate programs ranked in the top 20 by U.S. News & World Report and a research enterprise ranked No. 1 in the Midwest and No. 8 nationally for NIH funding. Our mission is to transform health, healthcare and policy through knowledge generation and translation, and through education of future nurse leaders from diverse backgrounds. More than 1,500 students are enrolled in bachelor's, master's and doctoral programs at our six Illinois campuses: Chicago, Peoria, Rockford, Quad Cities, Springfield and Urbana. We count among our outstanding faculty: seven members of the Sigma International Nurse Researcher Hall of Fame; 30 fellows of the American Academy of Nursing (AAN); and six former deans and professors named "Living Legends" of the AAN. All this at the University of Illinois Chicago, which has six times received the Higher Education Excellence in Diversity Award from INSIGHT Into Diversity magazine. Learn more at nursing.uic.edu.

The Center for Sleep and Health Research, Department of Biobehavioral Nursing Science seeks a Postdoctoral Research Associate to carry out projects in the field of sleep health and sleep disturbances including sleep-disordered breathing (SDB), circadian misalignment, and metabolic health in pregnancy. The research projects will use a behavioral sleep intervention to improve pregnancy outcomes. Expertise related to these research areas is ideal, but training will be offered. Highly motivated candidates with independency in biobehavioral research using quantitative methods, randomized control design, data gathering and analysis, manuscript, and grant preparation, as well as strong interpersonal skills are especially encouraged. The position is available now and will remain open until it is filled.

- Duties:
- Carry out projects in the fields of sleep and metabolic health
 - Collaborate with Principal Investigator, co-investigators, key personnel and researchers to design, manage and coordinate research grants/projects.
 - Design and conduct behavioral research
 - Collect, analyze and interpret data
 - Write abstracts, manuscripts for publication.
 - Contribute to and independently take part in grant writing and grant applications.
 - Publish original scientific research in peer-review journals and present at professional meetings.
 - Present results in national/international conferences
 - Advise undergraduate honors students and PhD students
 - Additional duties as assigned by supervisor

- Qualifications:
- Minimum Qualifications: PhD/Doctorate degree in nursing, public health, psychology, medicine or other related health science fields. **Applicants must be within the first five years of receiving their PhD/Doctorate to be eligible for this position.**
 - 1-3 years of related experience in biobehavioral research using quantitative methods. Expertise broadly relevant to project management, statistical analysis, and writing for publication in peer reviewed journals is necessary.
- Review of applicants will begin immediately; for fullest consideration, please complete an electronic application, including: (1) cover letter describing previous work, career goals and research interests; (2) CV; (3) contact information for 3 references.

Qualified candidates must be legally eligible for employment in the United States. This position is not eligible for Visa Sponsorship.
