The Aflac Cancer and Blood Disorders Center of Children's Healthcare of Atlanta, Emory University School of Medicine and Morehouse School of Medicine are **partnering in a \$16M expansion of our Sickle Cell Disease Program**, supported by an award from the Georgia Research Alliance, and investments from Children's Healthcare of Atlanta, Emory University, and Morehouse School of Medicine. This initiative builds on the excellence of our Sickle Cell Disease Program, which is the **largest pediatric clinical program in the country** and will focus on therapeutic development in sickle cell disease and includes the addition of three faculty members at Emory and one at Morehouse School of Medicine.

Children's Healthcare of Atlanta and Emory University have worked together since 1956, facilitating **leading-edge pediatric research**, training, and innovation. Together, our **partnership advances research and facilitates evidence-based quality care** for children. In 2020, the Emory Department of Pediatrics was the #1 ranked pediatric department in National Institutes of Health research funding.

This **job posting** is part of our ambitious \$200M investment to substantially grow our team of **world class child health researchers** over the next five years.
